

CONFIDENTIAL DISCLOSURE AGREEMENT
For Pre-Publication Access to Wild Emmer Wheat Genome Assembly and Annotation
Statement of Agreement

As a service to the plant research community, the International Wild Emmer Wheat genome Sequencing Consortium (WEWseq) would like to provide pre-publication access to whole genome shotgun reference sequence (RefSeq v.1.0) assembly of the genotype 'Zavitan'. This assembly and annotation is available for use under the terms of the Toronto Agreement (Nature 461, 168-170, 2009 doi:10.1038/461168a) on prepublication data sharing.

By accepting the agreement the user agrees:

- To respect the rights of the data producers and contributors to analyze and publish the first global analyses and certain other reserved analyses of this data set in a peer-reviewed publication. I understand that this includes:
 - Whole chromosome or whole genome level analyses on genes, gene families, repetitive sequences;
 - Comparative analysis with other organisms; and
 - Any other analyses that may limit the opportunity for the WEWseq data producers and contributors to publish the first global analysis.
- To not redistribute, release, or otherwise provide access to the data to anyone outside of my group, until the data has been published, submitted to the public data repositories, or, if not published, for one year from the conclusion of the individual project or initiative as carried out by the WEWseq.
- To contact the WEWseq (c/o Dr. Assaf Distelfeld email: adistel@post.tau.ac.il) and data producers to discuss any publication plans that utilize this data to avoid the overlap of any planned analyses.
- To cite accurately and completely the prepublication data, including any applicable version.
- Prior to publication of the reserved analyses, to credit “The International Wild Emmer Wheat Genome Sequencing Consortium”.
- That this data as accessed is precompetitive and is not patentable in its present state.
